

# DYNAPAC UPDATE

TO ALL DYNAPAC ROAD CONSTRUCTION EQUIPMENT STAKEHOLDERS

#2, 2017

## Dynapac equipment builds highway in Thailand

S. Tengtrairat Co., Ltd, located in the Nan Province in the north of Thailand, recently bought a Dynapac SD2500CS as well as a CC2200 asphalt roller. Historically, Tengtrairat Co., Ltd has bought mainly used Dynapac equipment. Now it was time to buy brand new machines from the Dynapac dealer Pin Siam instead. The main reason for purchase was the great ergonomics, ease of operations as well as the FleetLink system. For the Dynapac SD2500CS paver, the PaveManager 2.0 played an important role in the purchase decision.

The SD2500CS and the CC2200 have been used to pave and compact part of Highway No. 101 in the Nan Province. Similar jobs are queuing up and the performance by the Dynapac equipment has so far been very satisfactory.
